

# WizCommerce

## Data Analyst Intern

### About the company:

WizCommerce is on a mission to revolutionize B2B commerce! Over the last decade, we've seen remarkable advancements in B2C commerce with platforms like Shopify, Magento, etc. Yet, the B2B sphere seemed to lag behind, clinging to outdated processes and disjointed systems. That's where we see our mission - to bring about the same level of innovation and ease to B2B commerce.

We are building a SaaS platform to digitize B2B commerce businesses, factories, wholesalers, and distributors worldwide. We started with factories and have onboarded 800+ exporters in India within just 11 months of launch. Building on this momentum, we have recently expanded our reach to the US wholesale market, where our product has gained remarkable traction and success over the past 6 months.

With Wizcommerce, sales reps can take orders (at trade shows or elsewhere), upsell better with the industry's only AI engine and automate internal processes, all with our beautifully designed platform.

If you want to disrupt a Trillion\$+ space, WizCommerce is the place to be. Read more about us: [Techcrunch](#), [Forbes](#) & [our website](#).

### Founders:

[Divyaanshu Makkar](#) (Co-founder, CEO)

[Vikas Garg](#) (Co-founder, CPO)

### Why should you join us?

- **Huge Market Size:** B2B commerce is just in India and the US. Our two main geos are a 5 Trillion\$+ space, waiting to be disrupted. Every start-up has a risk of going to 0, but few have a market large enough to become 100B\$+ companies.
- **Never-ending exciting opportunities:** If you are a person who loves to dig deeper into problems, figure out solutions, take ownership and implement the solution and then chill - this is the right place for you. We are building something that has never been made before
- **Customers love us:** There are many times when customers have invited us to

stay with them to understand their pain points as we have exceeded their expectations in every feature launch, that's the ownership and quality bar we set here.

### **Job Description:**

### **Role & Responsibilities:**

- Data Collection and Cleaning: Assist in collecting, cleaning, and organizing large datasets from various sources.
- Data Analysis: Perform exploratory data analysis to identify trends, patterns, and anomalies within the data.
- Statistical Analysis: Utilize statistical techniques to extract meaningful insights and draw conclusions from the data.
- Data Visualization: Create clear and informative visualizations (charts, graphs, dashboards) to communicate key findings to managers.
- Report Generation: Assist in preparing reports and presentations summarizing analysis results and recommendations.
- Collaboration: Collaborate with cross-functional teams to understand business requirements and provide analytical support for decision-making.
- Continuous Learning: Stay updated on the latest trends and advancements in data analysis techniques and tools.

### **Requirements & Benefits:**

- Currently pursuing a Bachelor's degree in Data Science, Statistics, Computer Science, Mathematics, Economics, or a related field.
- Strong analytical and problem-solving skills with the ability to manipulate and analyze complex datasets.
- Proficiency in data analysis tools such as Python, R, or SQL. Experience with data visualization tools like Tableau or Power BI is a plus.
- Meticulous attention to detail and a commitment to producing accurate and high-quality work.
- Hands-on experience in data analysis within a professional setting.
- Mentorship from experienced data analysts.
- Exposure to real-world business challenges and decision-making processes.
- Networking opportunities with professionals in the field.
- Potential for future full-time employment opportunities based on performance and business needs.

**Compensation:** Best in the industry
